# BUILT WITHOUT COMPROMISE

## FACILITY

Located in Moncks Corner, South Carolina is our 200,000 square-foot manufacturing facility, which includes our own in-house metal fabrication shop and an interior/upholstery shop.

## RESEARCH & DEVELOPMENT

Sea Fox continuously strives to improve upon our existing designs, with real world testing and experimentation. All of our hulls are designed by a renowned naval architect and our plugs are then precision cut with a five-axis router. We continually make an effort to improve production while lowering costs by finding ways to implement the latest technologies and CAD design.

## QUALITY CONTROL

Sea Fox has strict quality control check points throughout the build process, starting in capping, assembly, and final inspection to ensure each boat meets both ABYC and Coast Guard requirements.

## STRINGERS

Each Sea Fox model has a completely sealed stringer system custom made for maximum strength and flotation. All stringers are professionally designed with CAD software and built with closed cell foam for a sealed system and added flotation.

## FABRICATION

Sea Fox uses the best raw materials in the industry today with vinyl ester barrier coats applied on every hull and deck to ensure gelcoat longevity for a lifetime of use. All Sea Fox models are hand laid with a 36/10 ounce fiberglass in the hull for a solid feel and ride. Stringers are custom made for each boat offering a completely sealed foam stringer system for added strength and flotation. All decks are completely cored with a high density foam composite offering stronger properties than resin based bonding agents. Once the bonding agent cures, the deck and hull are chemically bonded together for superior strength.

## UPHOLSTERY

We use premium marine grade 30-ounce vinyls on all of our models for strength and durability. Sea Fox beats the competition by exclusively offering Permaguard superior stain resistance on all of our vinyls. This provides unequalled resistance to scratches, scuffs, stains and abrasions for long term and trouble free performance. We now do all quilting in house with the ability to customize design and look for the customer. Our foams are some of the thickest in the industry, just take the "knee test" and simply lean your knee into the center of the cushion and then do the same to a competitor's. You will be amazed at the Sea Fox difference!

## ULTIMA HARD TOP

Our styling and smooth lines are only the beginning of what our hard tops have to offer. All Ultima hard tops come standard with an upgraded stereo system, LED spreader lights forward and aft, and not one, but two electronics boxes with acrylic doors. All Sea Fox hard tops feature a dedicated front safety storage compartment, ensuring your essential safety gear is always within reach and consistently located across every model.

# WHAT'S NEW AT SEA FOX

## 368 COMMANDER

The 368 Commander is the flagship of the Sea Fox family. At 36' LOA and 11' beam, the 368 Commander has a sharp 23 degree deadrise to handle rough water conditions. The 3" composite transom can hold twin or triple-application motors. The foam filled stringer mold is a beast with massive bonding points throughout the hull to ensure a solid ride in any weather condition.

Like all Sea Fox boats, the 368 is designed for comfort in the bow area with its extended multi-person front of console lounge and has multi-dimensional cushions for ultimate comfort. The cockpit is a serious angler's dream boasting twin 50 gallon aquarium live-wells that are also pressurized - 0% air, 100% water. Four in the floor fish boxes and two large refrigerator/freezer storage facilities located across the transom wall to keep bait, food and drinks at any temperature desired. Triple helm seats sit high for all around viewing and a full glass enclosure keeps the crew dry in all weather conditions.

The ultimate combination of performance, luxury, and fishability, the 368 Commander represents the culmination of everything we've learned over 28 years of constantly refining our designs, construction, and rigging.

armrests

**Transom** 38"

## 328 COMMANDER

The 328 Commander is designed with an eye for style and an emphasis on luxury — highlighted by bow seating with individual curved backrests, cozy sleeping quarters below deck, extensive LED accent lighting, a flat glass windshield, and top-shelf upholstery.

Don't let that fool you, though; the 328 Commander is a fishing machine at its core. In addition to its full-featured tackle and bait station, it boasts a 55-gallon pressurized, lighted transom live well with a clear lid; another 35-gallon lighted well with an aquarium wall in its port corner; four massive, over-board-draining fish boxes; 36 total rod holders plus extensive rod storage; smart touches like storage compartments forward and aft for five-gallon buckets; available Gemlux outriggers; and a standard anchor windlass with helm controls for effortless set up on that fishing spot.

With speeds up to 62 miles per hour, it's huge 10' 8" beam and wide Carolina flare at its bow, the 328 Commander is unbelievably agile and includes more standard features than any boat on the market in its category.

Come see the new console debut at the 2026 Miami Boat Show!

Standard Seating Fiberglass helm

pod with 3 deluxe fiberglass-backed bucket seats with flip armrests

Transom 35"

## 288 COMMANDER

A pedigreed fishing machine, the 288 Commander combines popular features found on our 328 Commander with a carefully redesigned layout and console. Part of that involves adding in features like the aquarium view livewell, new bow table design with integrated casting platform and a new curved lounge design. The result is a refined, capable offshore platform with more than a touch of style.

Forward of the console, the 288 is all premium-stitched luxury. Twin high-back loungers with ergonomically curved seating in front of the console that conceal a 75-gallon dry storage box, while a pair of aft-facing, curved-back loungers are built into the bow. Adding our new bow table design with integrated casting platform and a filler cushion, the bow area can be converted into either a full-width lounge, dining area or casting platform.

For long days on the water the step-down console hides a comfort station with head, sink, and portlight, while a 26-gallon freshwater tank makes for refreshing on-deck showers and easy tackle cleanup at the end of the day.

## 268 COMMANDER

The 268 Commander is big enough to fish the blue water even in less-than-perfect conditions, but small enough to tow easily — even for long distances. Similarly, she's small enough to deliver exciting performance with a single outboard, yet big enough to comfortably accommodate twins. Designed with the Yamaha in-line four cylinder 2.8L workhorse in mind this commander offers a great value with twin F150XD's and exceptional performance with the twin F200XA2's.

Like all Commanders, the 268 is a full-featured fishing platform that also offers comfortable and stylish seating and amenities forward of the console. In the cockpit, she features an impressive 30-gallon aquarium livewell with a dip-net storage compartment, two overboard-draining fish boxes, a side entry door for easy cockpit access and ample rod holders. A large aft bench seat that also lifts up for spacious bilge access provides plenty of cockpit seating. Forward, a generous console lounge provides comfortable seating and offers a 7-cf. storage tub below. With an aggressive, Carolina flared bow, and 20-degree deadrise, the 268 can get you to the fishing grounds fast and dry. Plus with 140 gallons of fuel — translating to a cruising range in excess of 300 miles — she'll get you home safely too.

## 248 COMMANDER

The 248 Commander represents the essence of Sea Fox design, engineering and quality. This single engine build offers a family friendly bow with ample seating and storage and an angler friendly stern. The cockpit offers plenty of room to reel in the catch of the day while the offshore hull with its impressive Carolina flair and 18 degree deadrise will get you to your favorite fishing waters comfortably and reliably.

## 228 COMMANDER

The 228 Commander is the perfect vessel to get your family fishing on the water. The pressurized aquarium livewell, bow casting platform, removable premium cooler, molded in rod storage and the roomy insulated aft fishbox will check all the angler's boxes. Your family's comfort is well considered when headed to the sandbar. Aft and forward facing bow seating, an easily accessible head, awesome stereo, and storage throughout will ensure everyone has an enjoyable time on the water.

## 288 TRAVELER

Introducing the largest in it's class and new to the line up this year, the 288T puts every inch of this 28' family and fishing machine to use with its roomy 9'3" beam. The command center at the helm comes standard with one 1243 Garmin and is complemented by an entertainment center featuring grill, sink, fridge, and a removable premium cooler. Across the way is the back to back lounge that is leading the industry in comfort and class. The aft racing recliner, fold down seating and removable table bring the comfort of home to the water, but easily packs away to transform the aft deck into a first class fishing platform. Deep bow seating and an impressive windshield that is integrated into the hardtop design will keep your entire family secure whether you are heading to the fishing grounds or your local dock & dine.

## 228 TRAVELER

Built on the same offshore hull platform as our Commander series, this boat brings the signature ride of our center consoles to a dual console application. A thoughtful open aft fishing deck offers plenty of seating for all of your friends and family. A step down head with optional electric toilet, large water sports storage box, and deep bow seating help give this Traveler the feel of some of our larger boats with the versatility of a 22' boat.

## 228 T

Fuel Capacity 106 gal  
Persons Capacity 8 Persons  
Total Capacity 2,200 lb  
Maximum Horsepower 250 hp  
Transom 25"

## 251 BAY FOX

This boat is an in-shore, near-shore, and even off-shore anglers dream. The proven hull design is met by a spacious bow casting platform with a tournament ready layout. Large steps integrated into the forward deck offer ample storage for fish or PFDs with rod storage easily accessible on the port side bow. The console boasts a commanding view of the action with a sleek black acrylic dash that can accommodate several navigation screen sizes and layouts. Although this boat takes fishing seriously, the aft casting platform transforms into highly functional seating and the console offers a step down head. The optional hardtop offers plenty of shade, storage and lighting while adding to the sly and stealthy design cues of the Bay Fox.

## 251 B

Centerline Length 24' 4"  
Beam 8' 6"  
Bridge Clearance 7'8"  
Dry Weight 3,370 lb  
Maximum Weight 5,286 lb  
Deadrise 15 degrees  
Draft (hull) 13"  
Fuel Capacity 72 gal  
Persons Capacity 8 Persons  
Total Capacity 2,200 lb  
Maximum Horsepower 300 hp  
Transom 25"

## 231 BAY FOX

The 231B offers an exceptional fishing platform with all the benefits of the 251B in a smaller package to easily tow. Integrated fiberglass swim platforms on the port and starboard plane pods allow for easy access in and out of this versatile bay boat. With the ability to do everything from staking the flats to trolling the Gulf Stream to towing tubes at the lake, there are few boat styles as versatile, intelligently designed, capable, and head-turning as the Bay Fox.

## 231 B

Centerline Length 22' 4"

Beam 8' 6"

Bridge Clearance 7'8"

Dry Weight 2,590 lb

Maximum Weight 4,401 lb

Deadrise 15 degrees

Draft (hull) 13"

Fuel Capacity 54 gal

Persons Capacity 8 Persons

Total Capacity 2,100 lb

Maximum Horsepower 250 hp

Transom 25"

## 248 SIDE CONSOLE

The 248S is the perfect boat to escape from the dock and the elements with its sly and functional side console design. The side console offers an oversized head and unique berth while providing fun wraparound bow seating. This boat is loaded with the essentials that you expect from Sea Fox like a roomy fishing cockpit, integrated transom livewell, insulated fishboxes, plush seating throughout, and abundant storage.

## 248 S

Centerline Length 24' 4"  
Beam 8' 6"

Persons Capacity 1,500 lb  
Total Capacity 2,500 lb  
Maximum Horsepower 300 hp  
Transom 25"

## 282 HYBRID LIGHT TACKLE

The all new 282 LT was engineered for every adventure and every tide. With an all new design for this hybrid hull, we aimed to blend the features of both inshore and offshore performance to create a versatile boat that can handle a variety of conditions. This boat is the first Sea Fox to have the option for a second station taking navigation and visibility to the next level. Upgrade your days of fishing with this feature and you'll never go back!
